

Cat[®] Remanufactured Electronic Control Units

Reliability. Availability. Affordability.

Cat Reman is expanding coverage of remanufactured Electronic Control Units (ECUs). These machine and engine controllers are used in all industry segments. Caterpillar employs state-of-the-art techniques, advanced remanufacturing processes and extensive testing to ensure these remanufactured ECUs deliver same-as-new performance and long life.

Remanufactured electronic products offer value by providing:

- Lower cost repair options
- Same-as-new performance
- Off-the-shelf availability to reduce downtime for repair
- Latest design improvements
- Extensive testing for maximum reliability
- Support for current and non-current product
- Worldwide warranty protection

Caterpillar. The difference counts.™

Cat[®] Dealers define world-class product support. We offer you the right parts and service solutions, when and where you need them.

The Cat Dealer network of highly trained experts keeps your entire fleet up and running to maximize your equipment investment.

CATERPILLAR[®]

Cat Remanufactured Electronic Control Units

Same-as-new Performance

Drawing on the broad experience and understanding Caterpillar has of heavy-duty application environments—like severe vibration, shock, extreme operation temperature ranges, thermal cycle, thermal shock, humidity, corrosion and excessive dust—Cat Reman has developed its own line of remanufactured ECUs. This ensures that electronic units are thoroughly diagnosed and remanufactured, and critical engineering updates are completed. When the remanufacturing process is complete, the units pass through rigorous durability test requirements so customers can rest assured these remanufactured ECUs will provide same-as-new performance and reliability.
